

Press Release

THNIC Foundation Launching “.th” Second-Level Domain Registration for 2020

Thai Network Information Center Foundation (THNIC) opens “.th” Second-Level Domain or SLD registration three rounds every year. There are good responses from the previous six years, there are more than 130 registrations for companies, trademarks, academic institutions and non-government organizations. This year, THNIC Foundation has announced the schedule as follows:

- **1st round during 1 February – 31 March 2020**
- **2nd round during 1 June – 31 July 2020**
- **3rd round during 1 October – 30 November 2020**

In this regard, THNIC Foundation has authorized **T.H.NIC Co., Ltd.**, the official registrar responsible for .th domain registration, to provide application and registration services of .th SLD. However, the .th SLD registration fee will be donated to THNIC Foundation directly.

All registration fees will be used for funding the promoting and developing the Internet in Thailand, e.g. **Net2Home project** which is a project bringing the Internet to local communities in remote area using low cost and effective technology; and **Bangkok Neutral Internet Exchange (BKNIX)** project which is a project for developing the Internet infrastructure to allow effective exchange of data within Thailand.

Anyone interested in registering an easy to remember and easy to access .th domain for your business identity can see guidelines and more details at <https://thnic.co.th/sld> or contact **email: sld@thnic.co.th** or **phone: (66)-2105-4007** for more information and inquiry.

About Thai Network Information Center Foundation

Thai Network Information Center (THNIC) Foundation is a not-for-profit organization which focuses on developing the Internet usage and Internet infrastructure in Thailand. The THNIC Foundation was established in 2007. The major mission of THNIC Foundation is to promote the usage of .th and .ไทย (dot Thai) domain names, as well as encouraging studies, research, and development to increase knowledge of internet technology. Another noteworthy mission is to push forward the development of Thai internet infrastructure, including but not limited to the areas of technological knowledge, internet speed, and value.
